

HEAVY EQUIPMENT OPERATOR

The heavy equipment operator must have sufficient knowledge and experience on excavators, graders, scrapers, compactors, Gradalls, backhoes, to perform safely and efficiently the varied tasks involved in irrigation and drainage construction and maintenance. He/she must have a sound working knowledge of his/her machine, and keep it properly adjusted and serviced, and see that needed repairs are made. He/she must be willing and able efficiently to operate all other equipment owned by the district, as well as instruct less experienced personnel in the operation of this equipment.

In the interest of keeping all employees steadily employed, he/she must be willing to perform all tasks which fall in classification below his/her own, as well as fill the lead position for any job, as authorized and directed by his/her supervisor.
